

CLAIMS

What is claimed is:

1. An apparatus for providing universal web access functionality comprising:
  - a first electronic device having a plurality of configurable Input/Output ports;
  - a network connection to said first electronic device on a first one of said plurality of configurable Input/Output ports; and
  - at least one second electronic device connected to said first electronic device on a second one of said plurality of configurable Input/Output ports,wherein said first electronic device serves web pages associated with said at least one second electronic device.

2. A method for providing universal web access functionality comprising:
  - providing a plurality of configurable Input/Output ports on a first electronic device;
  - connecting said first electronic device to a network via a first one of said plurality of configurable Input/Output ports; and
  - connecting at least one second electronic device to said first electronic device on a second one of said plurality of configurable Input/Output ports, wherein said first electronic device serves web pages associated with said at least one second electronic device.
